Forecast for Saturday 05 Oct 2024

Weather: Dry with clear spells overnight. Then a bright day with some good spells of sunshine developing although this may be rather hazy at times due to high cloud. Cloud begins to increase again through the late afternoon with outbreaks of rain spreading west through the evening.

Chance of cloud-free hill tops above 600m: Close to 100%, although chances fall through the evening

Low cloud and visibility: Little or no cloud below the summits through much of the day but occasional or periods of cloud above about 600-750m spreading east through the evening. Away from cloud, visibility very good with panoramic views of surrounding hills, falling to several kilometres in evening rain.

Forecast for Sunday 06 Oct 2024

Weather: A mostly cloudy day with outbreaks of rain. The rain is expected to become more persistent and occasionally heavy for a time from early afternoon before clearing to clear spells and scattered showers through the late afternoon and evening.

Maximum wind: Southerly or southeasterly 25-30mph, with gusts around 50mph over ridges and summits, decreasing 10-15mph through the afternoon.

Chance of cloud-free hill tops above 600m: Close to zero through much of the day, before improving, from the west, to 75% through the later afternoon and evening.

Low cloud and visibility: Periods or persistent cloud above about 450-600m, lowering to 300-450m at times in rain, becoming occasional above about 600-750m through the late afternoon and evening. Away from cloud visibility good falling to several kilometres in rain, becoming mainly very good through the late afternoon and evening.

Temperature: **Valleys:** Plus 10 or 11 Celsius at dawn rising to plus 15 or 16 Celsius by early afternoon
At 600m: Around plus 9 or 10 Celsius
Freezing level: Above the summits
